

Overton's Trailer Step Mounting Instructions

1. Determine the best spot on your trailer winch stand for mounting the step.
2. Position the step next to the frame allowing access to both mounting holes in the step.
3. Slide the U-bolt around the frame and through the holes in the step.
4. Place a flat washer, then a lock washer onto each leg of the U-bolt.
5. Screw a nut onto each leg of the U-bolt.
6. Before tightening the nuts, adjust the step up or down on the frame and hold it at the desired location.
7. Finally, using a wrench, tighten the nuts in place. For extra protection against the nuts loosening, add a second nut to each leg bolt and tighten with a wrench.
